

QA Coatings

Home Page

Do You Need Durable Coatings and Paints? Welcome...

QA Coatings provides quality *surface coatings, paints*, and innovative products for the building industry and individual contractors.

Being founded by a Chemist with Surface Coatings technical knowledge, QA Coatings is fast becoming a leader in its field. We not only pioneer new products to meet the needs of surface waterproofing, durability, resistance to heat, etc., but also help with specific advice on which product to use for your application.

Our factory is located in Clontarf, northern Brisbane, but you can order over the Internet or by phone from anywhere in Australia. Be assured of our friendly customer service and speedy delivery.

Colour matching can be done on all paints and products.

----- SUMMARIES -----

Concrete Sealers

Clear or coloured sealers for sealing concrete, pebble, exposed aggregate, spray on, stamped concrete and pavers. Water based sealants - available in acrylic or polyurethane/acrylic blends. Also supplying traditional solvent sealers.

Industrial Floor Coatings

A range of coatings available for workshops, industrial floors, garages, playrooms, or any hard-wearing area. Smooth or non-slip grades, giving an attractive look and a hard finish. ... Read more.

[next page] Choose from epoxy sealed flake, acrylic and urethane/acrylic base.

Roof Coatings and Heat Reduction Coatings

Using hollow ceramic sphere technology and premium acrylic copolymers, these coatings **substantially reduce heat transfer into buildings**. Suitable for roofs, walls, and tilt concrete panel factories.

Waterproofing Products & Solutions

Wherever it needs it, we have a waterproofing solution... membranes and coatings for roofs, walls, shower trays, and more. For the exterior, try our

acrylics, synthetic rubbers or epoxies, plus water repellents that retain the natural look of masonry surfaces or bricks. ... Read more

[next page] **Mould exterminator.**

Our rising damp solutions and mould killers are shown to keep the mildew from forming for up to months.

Just spray, leave it a minute, and it works for you! Remember, a cheaper chlorine solution will not work as well as this formula. You can even paint over it, with just minor preparation, the next day.

Sizes

Termite Deterrent Timber Coatings

A safe, water-based bitumen coating with proven termite deterring agents. For outdoor use, e.g. fence posts, deck poles, our termite resistant membrane coating is ideal. It is truly waterproof.

Premium Paints

Internal and external paints, factory direct, and made to order in any colour! Flat, low sheen, satin, and full gloss, plus high technology, new generation water-based enamel.

[sub-section] Artists Paints

Premium acrylic artist paints available in a wide range of colours and two sizes. Clears and artist extrude premium paint also available.

Tennis and Netball Court Coatings
