To include:

Founded in 1999, Swift Metal Services remains a family owned business. Our team are committed to the core values of the company, ensuring we do what is best for the customer, each other and the enterprise.

C – Customer Experience

The Swift Metal team are committed to providing an outstanding customer experience at every point of contact. We strive to create life-long partnerships with our customers, through exceptional communication and personal interaction.

O – Operational Excellence

To us, this means that anything we do, is done in the best possible way. Our people are focused on achieving excellence in all areas, continually improving processes and self-development. Our admin, manufacturing and job reporting procedures provide accurate up-to-the minute job updates and delivery schedules.

R – Reliability and Trust

Our team are steadfast in maintaining openness and honesty in all business relationships. Matters of confidentiality are respected and honoured. We believe in transparency and integrity.

E – Expertise

We are a unique company, with a unique skills base. Our team is made up of incredible people that have a passion for continuous improvement and attention to detail. As a single source supplier, it is important that from the shop-floor trained sales and customer service team, to manufacturing and safety, everything we do ensures a quality outcome for our clients, staff and the community.

Our Partnership Approach

Partnership – ‘The joining together of two parties working towards a common goal’

Our partnership approach to contract manufacturing means that we believe in forming alliances with our clients and working with them to achieve their goals and expectations. We try to be consistently in sync with our customer’s product strategies, so we are able to provide components and assemblies according to their specifications and time frames. We work together to ensure every aspect of the procurement and manufacturing processes are communicated, understood and controlled through strategic planning and exchange of information. As a result, this helps to build, confidence, trust and therefore leads to mutually beneficial relationships.

We do not want to be just a voice on the phone or a name in an email, we want to get to know our customers and develop sincere relationships. That way, if problems should arise in the transaction, we have trust and the confidence we need in one another to work things out quickly and effortlessly.

PARAGRAPH A

As part of developing a partnership with our clients we offer full-service contract manufacturing. We are committed to operational excellence and leverage our capabilities to deliver trouble free experiences to our customers. Taking care of requirements from the initial design of the components, through to the final packaging and assembly of the products means that clients can be confident in the delivery of their parts.

Component Design:

All our sales and technical team are shop-floor trained and eager to assist you with design and development of your parts.

Pressing & Stamping:

Our range of presses means we have the capabilities to press and form all types of ferrous and non-ferrous metals. The inclusion of an experienced in-house tool-maker allows us to provide tool building services as well as the ongoing repairs and maintenance to existing tooling.

Machining & Thread Rolling:

We have the facilities to supply large quantities of precision machined components & thread rolled parts to a diverse range of industries across Australia.

Punching and Drilling:

We offer manual, automatic and CNC punching and drilling capabilities. Assessing which of these capabilities best suits the requirement. Guaranteeing a flawless and economical result.

- **Similar idea to attached Appendix A**

Repetition fabrication and Welding:

Our entire operation optimizes high production runs and repetitive fabrication and mig & tig welding services.

Bending and Forming:

We employ cutting-edge Metal Bending, Folding & Forming technology for the efficient production brackets and components

Surface Finishing & Coatings:

To work with our turn-key manufacturing solution we also can take care of the coating or finishing of your components. Our team are available to advise you of the most effective finish for your product.

Component Assy & Packaging:

We also offer an assembly and packaging service. We adhere to your strict specifications and requirements to produce high quality finished products, ready for final assembly or sale.

Transport :

We provide FIS transport options all over Australia and into New Zealand.
