

WORDPRESS ERRORS 22/03/2018

I own 2 X wordpress sites as follows

1. <http://www.hedgingbets-pro.com>
2. <http://www.my-arbershop.com>.

The sites have 5 small errors that need fixing .

www.hedgingbets-pro.com

1. the site has a free 12 day trial , at the end of the 12 days customers are required to subscribe / pay or disappear , I believe this is not working , that is it is not cutting out / stopping access to my data after the 12 days has expired . Note there are 26 ? people in the database at present , these MAY have been given an expiry date , but I am not certain this has been done correctly . Of course the correct and fault free 12 day free trial is required for all FUTURE customers / users as well . (this same problem exists in my other website , www.my-arbershop.com) see below.
2. we need updated versions of the program installed into this website as and when required , I will send you the new version , you delete the old one in the website at that time and install the new one

The above are the 2 errors in the site , www.hedgingbets-pro.com

These are the 3 errors in the website , <http://www.my-arbershop.com>

1. as per item 1 above , in the errors list for www.hedgingbets-pro.com , the 12 day free trial is not working correctly , the problem has definitely NOT been fixed in this website , there are 4 users in the database in think
2. I want the name of this website changed from www.my-arbershop.com to www.arbitrage-pro.com. I have registered this domain name with crazydomains ok , it is mine . What is happening at present is my site , my-arbershop is getting lost amongst 4 million plus names beginning with BARBERSHOP in google , I cannot find it myself.
3. Both of these sites are hosted with , www.hosting24.com , they have told me I CANNOT change the site name with them but I can put it in an ADD ON in the new name . I do not understand this .(in my account with hosting24 I get 5 sites hosted for the one charge)
4. is it sufficient that you just change the name in the website as I want , does it have to be changed at the hosting company, my main concern is the google listing surely that relates to the website name ??? what happens if I just forget changing the name in the hosting account, or should I just close the my-arbershop.com hosting account at hosting24.com and have it hosted with another host ?
5. 5. updated versions of the programs have to be installed in the websites as required and explained in item 2 in hedgingbets.com above.
