

Actors

Actors:

Actors represent the types of users who will be performing on the portal. Open Source Idea Management Application represent 4 types of user depending on the access level and two subordinate users. Here we are sharing a small introduction about each user type to below.

Admin: Admin will have whole access to add, edit and manage the entire site and user types. Admin can create and user, can suspend any user, can edit or modify any ideas, admin have the archive control facilities and many more.

User: In this portal users are mainly belonging from developer's background, specialized in Salesforce technology. Developers can participate on any ideas or if they have any idea they can upload that on the portal. Now to share any idea they have to activate their **subordinate account (Idea Owner)** which will be immerged on the same dashboard only. User can have that option where they can collaborate their ideas to other members.

In other side there will be an option for the developer to **collaborate** a time to any individual project.

Special Contributors: Contributors will play a vital role in the portal. Admin will allocate this panel with some extra features where contributors can help any project or ideas as a mentor.

Moderators: This portal access will be provided by the admin as a reward to specific users depending on their performance on the portal. Moderator can verify ideas before publish, they have an ability to restrict any user account, can check all the project details and forums discussion etc.
